- Html, CSS, Shell.

Backend

Strong with Java and Javascript Ecosystems.

- Java > Spring boot
- Nodejs > NestJs, ExpressJs.
- C# > .Net.

Frontend

Strong Javascript Ecosystem.

- React Native > NativeBase, Native Elements, UI Kitten
- .Reactjs > NextJs, Tailwind.

Databases

- Mysql, PostgreSQL, OracleSql.
- MongoDB, Firebase, Redis, Elastic search

DevOps and CI/CD

- AWS, GCP, Kubernetes.
- Docker, PM2.
- Jenkins, Github action, Gitlab-CI.
- Nginx, Apache2
- Cloudflare

Others:

- RabbitMQ, Kaffka, Grafana
- Sentry
- Design Pattern
- Data Structure, Algorithm.

Operating Systems

- MacOS
- Windows
- Linux

Language:

- English: Intermediate:

Experience **Born** | born.com | **Backend Engineer** _____ 08/2025 - Now

Born is a consumer social startup on a mission to "make digital life happen". The company is redefining human-AI relationships by building "AI friends" with authentic "human texture," moving beyond traditional social media engagement tactics.

Teamsize: 12 persons includes 5 Backend and 7 Mobile.

Technical stack: Node.js, high-scale real-time infrastructure, AI integration, and cloud-native services (AWS/GCP) for the Backend side. React Native with Godot for the mobile side.

Responsibilities: Designing and scaling backend systems to support a rapidly growing user base of over 20 million users, with an architectural focus on reaching billions.

- Developing the core infrastructure for "AI friends," ensuring seamless, real-time interaction between humans and AI entities.
- Implementing high-concurrency social features that prioritize "human texture" and authentic relationships over short-term engagement hacks.
- Upholding a high-bar shipping culture: "Building like the future depends on it" and delivering robust, scalable code in a "Day 0" environment.

Key Projects:

- **AI FRIENDS CORE:** Contributing to the fundamental engine that powers digital companionship, focusing on low-latency response times and complex data synchronization to ensure AI interactions feel natural and persistent.
- **SCALABLE SOCIAL BACKEND:** Architecting services to handle the "asymmetrical" growth of a global social platform, competing directly with industry giants like Meta and OpenAI.

Liberty Technology | libertytechnology.co | **Tech Leader** _____ 05/2023 - 07/2025

Liberty Technology Vietnam (libertytechnology.co) is a tech solutions provider in Southeast Asia, specializing in web and mobile app development, system operations, and offshore development centers.

Teamsize: 12 persons includes 3 Backend, 4 mobile, 2 Frontend and 3 fullstack.

Technical stack: Nodejs, NestJs for backend. ReactJs, Nextjs for frontend ReactNative for mobile. MySql, MongoDB for databases. AWS for Ops and others like Redis, RabbitMq, Elasticsearch, etc.

Responsibilities: As a Technical Leader at Liberty Technology, I spearhead the design, development, and delivery of innovative web and mobile solutions like Liberty Carz and Liberty Currency. I guide my team, ensuring technical excellence, fostering growth, and optimizing our Node.js, React, and AWS-based stack. My role is to drive project success and enhance our technological capabilities.

Key Projects

- **LIBERTY CARZ** (libertycarz.com): is Cambodia's leading online car marketplace, offering a seamless one-stop service for buying, selling, and renting cars and providing many vehicle selections. Liberty Carz has revolutionized the car trading

industry in Cambodia, boasting a vast network of dealers and a dedicated customer support team. After 2 years, Got **over 20.000 Car sales** in the application. **Over 170.000 total downloads** on ios and androids.

- **LIBERTY CURRENCY** (*libertycurrency.co*): A leading Cambodian fintech company, offering comprehensive money transfer and currency exchange services across over 15 currencies. The company leverages cutting-edge technology through its mobile app, ensuring smooth, real-time money transfers with competitive exchange rates.
- **BELINK HRM**: Belink HRM is a comprehensive digital HR platform designed to streamline workforce management, optimize operations, and enhance employee engagement within Liberty Group. It enables seamless coordination, allocation, and administration of human resources, helping organizations achieve their strategic goals.

Itaphoa Ltd (Mio) | mioapp.co | Fullstack _____ 02/2022 - 04/2023

Social commerce company Mio fills the gap in low delivery in small cities and rural areas in Vietnam by building a reseller network and logistics infrastructure that can offer next-day delivery to tier 2 and 3 cities. **Raised 8 million dollar Series A round** from Jungle Ventures.

Technical stack: NodeJs for backend. ReactJs for frontend ReactNative for mobile. PostgreSQL, MongoDB for databases. AWS for Ops and others like Redis, RabbitMq, etc.

Teamsize: 9 persons includes 2 Backend, 2 mobile, 1 Frontend and 4 fullstack.

Responsibilities: I built and maintained end-to-end features for the Mio App and Driver App using Node.js, React, and AWS, supporting their social commerce platform and logistics network.

Key Projects:

- **MIO APP** (*mioapp.co*): Mio App is a community application for groups of friends, colleagues, neighbors, to buy together fresh items imported directly from farmers and gardeners, ensuring the best price for everyone.
- **DRIVER APP**: The application support for driver delivery packages is fast and accurate.

Viatick | viatick.com | Fullstack _____ 03/2021 - 02/2022

A Singapore-based company specializes in indoor positioning through Bluetooth. Coupled with our positioning algorithm, the location of a particular object (personnel or asset), is accurately earmarked on a per second basis.

Technical stack: NodeJs for backend. ReactJs for frontend ReactNative for mobile. PostgreSQL, MongoDB for databases. AWS for Ops and others like Redis, RabbitMq, etc.

Teamsize: 12 fullstacks.

Responsibilities: As a Fullstack Developer at Viatick, I developed real-time indoor positioning solutions like the Safe Event Tool using Node.js, React, and AWS. I was responsible for both front-end and back-end development, ensuring accurate location tracking for MICE sector compliance.

Key Projects:

- *SAFE EVENT TOOL: To facilitate the reopening of events in Singapore, Viatick designed the Safe Event Tool. This solution is targeted at ensuring compliance with the existing Safe Management Measures whilst boosting confidence to the Meetings, Incentives, Conventions, and Exhibitions (MICE) sector*

Propzy Vietnam Ltd co | propzy.net | Backend _____ 07/2020 - 03/2021

A full-stack real estate platform that originates and facilitates property sale and leasing transactions in Vietnam.

Technical stack: Java, Spring for backend. PHP, ReactJs for frontend Android for mobile apps. PostgreSQL for databases.

Teamsize: 9 persons includes 2 Backend, 2 mobile, 1 Frontend and 4 fullstack.

Responsibilities: As a Backend Developer at Propzy Vietnam, I built and optimized critical internal systems like the SAM Application using Java and Spring. My work enabled sales teams to efficiently manage customer and real estate data, including automated property matching and scheduling.

Key Projects:

- **SAM Application, Dashboard:** The internal application in Propzy, that supports the sales team find, store, view, control the customer information. This application includes control of the real estate. Auto adapt and find the best real estate for any customer when they need to buy a new house. This is the unique tool in the world for helping the sales team to find the customer, make a schedule for meeting with customer, make schedule with customer to view the list of real estates. Auto check the status of real estate, etc

Scommerce Investment Corporation | Fullstack _____ 01/2019 - 07/2020

Scommerce is one of the leading Vietnam e-logistics service providers, offering last-mile express and instant delivery, as well as B2B trucking and fulfillment services under the brands GHN and AhaMove - delivery partners for Vietnam's four largest ecommerce platforms - Shopee, Tiki, Sendo, and Lazada - as well as over 100,000 online small and medium-sized merchants.

Technical stack: Java, Spring for backend, ReactJs for frontend. PostgreSQL for databases.

Teamsize: 4 persons includes 2 Backend, 1 Frontend and 1 fullstack.

Responsibilities: As a Fullstack Developer at Scommerce, I built Java/Spring and React.js applications, including the HRM, Compensation, and COD systems, managing operations for 18,000+ employees and millions of deliveries across GHN and AhaMove. I ensured scalable and efficient solutions for Vietnam's leading e-logistics provider.

Key Projects:

- **HRM SYSTEM:** Scommerce's HRM system supports employee management, automatic salary calculation. Supports tax code management. With **more than 18,000 employees** across Vietnam, including office staff and delivery staff of subsidiaries GHN, Ahamove, etc.
- **COMPENSATION SYSTEM:** created to automatically calculate specific cases during the delivery process. Reported. Will automatically refund, deduct money from the driver's or customer's account in case of errors during the delivery process.
- **CASH ON DELIVERY SYSTEM (COD):** was created for the implementation of the GHN company's buy now pay later system. It has been successfully deployed in major cities such as Hanoi and Ho Chi Minh City.

Ohana (Doong PTE LTD) | ohanaliving.vn | Fullstack _____ 01/2018 - 01/2019

Ohana is a startup created a platform that helps to connect landlords and renters directly. **Achieved more than 65.000 users** and **downloaded** applications after **6 months**, Successful raised 3.5 billions VND in Shark Tank Vietnam.

Technical stack: NodeJs for backend. ReactJs for frontend ReactNative for mobile. MongoDB for databases.

Teamsize: 5 fullstacks.

Responsibilities: As a Fullstack Developer at Ohana, I built and maintained the Node.js and React-based platform connecting landlords and renters, helping the startup gain 65,000+ users and successfully raise 3.5 billion VND.

UNIT Corporation | unit.com.vn | Backend _____ 02/2017 - 01/2018

UNIT Corp is dedicated to providing reputable Financial Software and Business Management Solutions in the Vietnamese and foreign markets with software services, software Reseller, software Integration.

Technical stack: Java, Spring for backend. Thymeleaf for frontend. Oracle SQL for database, Jboss server

Technical stack: Java, C# for the backend. HTML, CSS, JS for frontend. MS-SQL for database.

Teamsize: 5 persons includes 3 Fullstack and 2 Frontend.

Responsibilities: As a Fullstack Developer at Vasontel JSC, I developed enterprise solutions using Java/.NET and web technologies (HTML/CSS/JS) for various industries, contributing to diverse business models.

Other Projects

Vitadairy Loyalty App | vitadairy.vn | Fullstack _____ 2020 - 2025

An application of VitaDairy Vietnam Joint Stock Company to provide consumers with the safest and most economical solution when using VitaDairy's dairy products. Successfully generated **\$500k in direct revenue** for the project and spearheaded efforts to help the client acquire an impressive **1.5 million users** for their application. My marketing initiatives and user engagement strategies propelled the app into the **top 30 of the Lifestyle** category on the Vietnam App Store, solidifying its presence in a competitive market.

Technical stack: Java spring for the backend. ReactJs for frontend. Flutter for the mobile and PostgreSQL for databases..

Teamsize: 5 persons includes 1 Backend 1 Frontend and 3 Fullstack.

Responsibilities: As a **Fullstack Developer** for the Vitadairy Loyalty App, I drove the development of this Java Spring, React.js, and Flutter application, generating **\$500k in direct revenue** and acquiring **1.5 million users**. My contributions propelled the app into the top 30 of Vietnam's Lifestyle App Store category.

Vietlott | vietlott.vn | Backend _____ 2021

As a backend developer for Vietlott, **Vietnam's official computerized lottery platform**, I played a key role in designing, developing, and maintaining scalable and secure backend systems to support the company's nationwide digital lottery operations. Vietlott handles

high transaction volumes and requires robust infrastructure to ensure reliability, data integrity, and compliance with government regulations.

Technical stack: Java spring for the backend. ReactJs for frontend. Flutter for the mobile and PostgreSQL for databases..

Teamsize: 9 persons includes 4 Backend 2 Frontend and 3 Mobile.

Responsibilities: As a Backend Developer for Vietlott, I designed and maintained scalable and secure Java Spring backend systems for Vietnam's official lottery platform. My role ensured the reliability and integrity of high-volume transactions and compliance with regulations.

Side Project

NPort (Open-Source Project) | nport.link | **Owner** _____ 2023 - Now

Description: Developed an open-source, cross-platform tunneling tool designed to create secure HTTP/HTTPS connections from localhost to public URLs. Serves as a lightweight, developer-friendly alternative to commercial tools like ngrok by providing persistent subdomains for free.

Product Traction & Performance:

- Achieved **460+ stars on GitHub**, demonstrating strong community validation and adoption within the open-source ecosystem.
- Maintains a consistent user base of **110+ Daily Active Users (DAU)**, with a steady baseline of **15+ concurrent active connections** at any given time.
- Engineered a high-performance infrastructure capable of handling up to **200 concurrent users** while maintaining low latency and connection stability.

Technical Stack: Node.js, Bash Script, Cloudflare Zero Trust/Workers.

Education **Greenwich** | greenwich.edu.vn _____ 2015 - 2019

Bachelor of computer science

College of Trade, Economics and Techniques | ctet.edu.vn _____ 2011 - 2014

Bachelor of Accounting

Certificate **Aptech** | aptech.fpt.edu.vn _____ 2017

Aptech Certified Computer Professional (ACCP)

Talent

Reached **103.852 scores** in [T-Rex | Dinosaur Game](#) on Chrome browser.
